

ALICE: THE BCPS ACTIVE ASSAILANT PROTOCOL

Department of School Safety

ALICE PROTOCOL

Safe Schools Act of 2018

The Safe Schools Act of 2018 requires school systems in Maryland to conduct active assailant drills. An active assailant is someone who enters or approaches a building with the intent of doing harm to others. In many cases, an active assailant is an active shooter but could also use other means to inflict harm.

ALICE PROTOCOL

PARTNERSHIP

During the fall of 2018, Baltimore County Public Schools in partnership with the Baltimore County Police Department will introduce a new response to an active assailant.

ALICE PROTOCOL

PREPARATIONS

- During summer 2018, over 300 administrators, law enforcement personnel, and lead teachers received certification in the selected protocol.

Three, 2-day instructor trainer sessions were held during the months of July and August. Instructors had to complete an online test for certification in order to train school staff.

- School staff first completed a one-hour, online training and then school staff participated in a three-hour face-to-face training prior to the start of school.

ACTIVE ASSAILANT RESPONSE

WHY CHANGE?

Case studies of several active shooter incidents such as Columbine High School, Virginia Tech University, and Sandy Hook Elementary School have shown that using a *lockdown* protocol alone resulted in an increase in casualties.

Federal and local agencies and law enforcement partners recommend an option-based protocol.

ALICE PROTOCOL

ALICE

The active assailant protocol selected for Baltimore County Public Schools is called ALICE. ALICE stands for:

- Alert – receiving initial notice of a critical event
- Lockdown – securing occupants behind closed doors
- Inform – notifying staff and students of potential danger throughout the event
- Counter – creating noise, movement, distance, and distraction
- Evacuate – leaving the area of the danger

These responses are not implemented in any specific order.

ALICE PROTOCOL

WHAT'S DIFFERENT?

ALICE is an option-based protocol. Staff and students will respond based on the information they have about the situation. In the past, the only option available was *lockdown*.

- Lockdown will be updated to an enhanced lockdown protocol.
- Evacuation will be to a location off of school grounds.
- If an active assailant breaches a secure location, occupants will counter the attacker.
- Information will be provided during the event as available and as possible.

ALICE PROTOCOL

HOW WILL STUDENTS LEARN THE NEW PROTOCOL?

- Current protocols will remain in place until students have been informed and trained.
- Students will receive information about the various protocol in an age-appropriate way. *Students are already familiar with the protocols currently used by BCPS.*
- Students will participate in scenario-based drills that will gradually acquaint them with the best response protocol based on their situation. *Students currently practice eight emergency responses.*
- Parents will receive notification of active assailant drills and a summary of the content of the drill as the new protocol is introduced.
